PROFILE

Computer Science graduate (Cyber Security and AI specialization, specialization-year average 96) focused on AI security: a team LLM red-teaming framework evaluated on JailbreakBench and Hack The Box training in prompt injection. IT System Administrator at Earnix (fintech, ~450 employees), administering Claude Enterprise and Microsoft 365 Copilot with Purview DLP.

EXPERIENCE

IT System Administrator Nov 2025 - Present

Earnix

- Administered Claude Enterprise and Microsoft 365 Copilot (SSO, licensing, spend limits) with Purview DLP policies for AI tools; built an internal IT agent with Agent Builder, used by the IT team.
- Designed and enforced Conditional Access policies for ~450 users as Zero Trust controls: MFA and SSO, legacy authentication blocking and device compliance gating.
- Secured the Apple Business Manager API integration with OAuth 2.0 and ES256 signed JWTs, keeping the private key in Azure Key Vault behind a managed identity scoped to a single secret.
- Configured Entra ID Enterprise Applications with SAML SSO, MFA, user provisioning and group-based access, reconciling application-side users against Entra assignments.
- Triaged Microsoft Defender XDR incidents and wrote KQL custom detection rules; investigated alerts escalated by the managed SOC and returned verdicts.

Computer Technician | *Malam Team* 2025

PROJECTS

LLM Red-Teaming & ML-Guided Threat Classification | team project | github.com/YuriMatyash/ML-Guided-Cyber-Security

- Adversarial judge and mutator framework that tests LLM guardrails, evaluated on JailbreakBench across four harm categories mapped to OWASP LLM Top 10.

Evation Cyber Platform | capstone, grade 100 | github.com/yanivbahalul/Evation-cyber-platform

- Full stack security and deception platform with an API gateway and real-time telemetry (Socket.IO); built the deception layer: honeypots, tarpits and dynamic decoy dashboards.

EDUCATION

B.Sc. Computer Science | Holon Institute of Technology (HIT) June 2026

Cyber Security and AI specialization. Specialization-year average 96, cumulative 86. Courses: Introduction to AI-Driven Cybersecurity (100), Machine Learning (100), Computer Security (100).

SKILLS & LANGUAGES

AI Security: prompt injection, jailbreak techniques, OWASP Top 10 for LLM, ML threat classification (Scikit-learn, PyTorch)

Offensive & Detection: Kali Linux, Nmap, Metasploit, Burp Suite (academic), Wireshark, MITRE ATT&CK, KQL detection rules

Development: Python (Flask, FastAPI), PowerShell, Bash, SQL, Git, Linux, Claude Code

Training: Hack The Box Academy: Prompt Injection Attacks, LLM Output Attacks, Introduction to Red Teaming AI, Applications of AI in InfoSec, Fundamentals of AI

Languages: Hebrew (native), English (fluent)

Military Service: Combat soldier, Israel Border Police (Magav)
